the "Brexit".

According to unverified information, the British may intend to take a revenge against me because they believe that my criticism against them, through my website www.agorapoliton.gr, has, probably, contributed to the development of the rest of the E.U. member-States hard negotiations' line.

My reactions as to this unverified information are, to urgently get in contact with certain non-NATO civilised States in order to arrange for my urgent transportation to their land and to publicize this article.

"Speaking without fences and pseudo-nobility, the psychiatrist, like any psychotherapist, is a poor "devil", an impersonal lackey of power who, for a miserable reward, he is substituting the priest and the policeman in the sphere of the mental activity. It is a pityful executive pawn of the, necessary to the political establishment, quasi "police of thought", which has undertaken on the duty of correcting whatever differs from the mainstream, by using its horrible means of beating, chains, electrocution, surgery, and pharmaceutical lobotomy and logaritration. And all these in return for just, earning his living and some social "prestige".

The psychiatrist is a clerk of the political power assigned to a depressing and dirty intermediate executive role. It is a tragic existence that is being wiped and crushed in an unresolved contradiction resulting from the official duty assigned to it: A contradiction expressed by the obligation to "resolve" moral and political problems, by using supposedly medical methods".

The above revelations made by Dr Kleanthis Grivas, who is an "insider", are one hundred percent accurate.

In the countries which are being, like Greece, settler-colonised by the U2RIT the most, if not the entire, part of the pseudo-science "psychiatry" has been, actually, militarised and, again actually, "drugged and maddened with opiates before hand" ruthless settlers have been recruited and pretend, even if they possess legitimate university degrees, that they are doctors. The candidate-victims, meaning the innocent civilians which, the colonising establishment has designated them as "targeted individuals", they are being unsuspectingly poisoned with neurotoxic chemicals, by "drugged and maddened with opiates beforehand" settlers in order for them to manifest seemingly spontaneous, but actually induced, mental disfunctions; simultaneously, forged testimonies are being perpetrated against them to the local authorities by "drugged and maddened with opiates beforehand" settlers in order for these authorities to initiate investigations against the candidate-victims; and finally, "drugged and maddened with opiates beforehand" settlers recruited at the "psychiatric" domain, while avoiding to perform any kind of laboratory tests (in case that reliable diagnostic laborarories in such victimized countries could ever existed) able to trace the neurotoxic chemicals, they issue false mental diagnoses in order to illegitimately and unjustly institutionalise them.

The, judicial and the security, authorities of the settler-colonised countries-"khanates" know everything and complicit.

As to, how the the colonising establishment is able to poison with neurotoxic chemicals the designated "targeted individuals", while, under such political conditions it is obvious that, the ordinary citizens and even more, the political dissidents, most certainly, they, definitely, remain alarmed and undertake every preventive measure in order to protect themselves; there should be an answer to this issue. I do not exclude the possibility that, I know this answer, though I believe that, the life expectancy of anyone who might disclose publicly this answer might become reduced to, maybe, two hours, in the best case.

For the above allegations, there are, undeniable legal evidence; names of individuals; names of front-organisations; lawsuits; criminals who destroyed innocent civilians; innumerable innocent victims; and known facts.

The ordinary European citizens, from what it seems, believe that the Soviet "psychiatric" Gulags are, merely, historical facts of the past and nothing more. They are wrong. Thousands of innocent and sane civilians are being tortured by this totalitarian, militarised "psychiatry"; the lives of thousands of innocent and sane civilians are being destroyed because of the contemporary, monstrous manifestations of the settler-colonialism.

Is the contemporary, settler-colonialism that monstrous?

No, the contemporary, settler-colonialism is far more monstrous than that!

Greece is a country within which the so-called "psychiatry" has been militarised in order to destroy the innocent Greek dissidents. Other European Union member-States may suffer the same catastrophe; but I would better say no more.

Christos Boumpoulis

economist

P.S.: The British should, somehow (enlightenment maybe?), realize that, revenge remains one of the most effective ways for anyone to pave the way for his own catastrophe while one's, actively showing of good will, usually, paves the way for the normalization of his relationship with his environment, of every kind.

Totalitarian "Psychiatry"

33 ΕΡΩΤΗΜΑΤΑ

ΓΙΑ ΤΟΝ ΨΥΧΙΑΤΡΙΚΟ ΟΛΟΚΛΗΡΩΤΙΣΜΟ

10. Ποιος είναι ο κοινωνικός ρόλος του ψυχιάτρου;

Μιλώντας χωρίς περιφράσεις και ψευτο-ευγένειες, ο ψυχίατρος όπως κάθε ψυχοτεχνικός, είναι ένας φτωχοδιάβολος, ένας απρόσωπος λακές της εξουσίας που έναντι πινακίου φακής, υποκαθιστά τον παπά και τον χωροφύλακα στη σφαίρα της ψυχικής δραστηριότητας. Είναι ένα θλιβερό εκτελεστικό όργανο της αναγκαίας για την εξουσία

αστυνομίας της σκέψης, που έχει αναλάβει τον φρονηματισμό του διαφορετικού με τα αποτρόπαια μέσα του ξυλοδαρμού, των αλυσίδων, της ηλεκτροκεραυνοβόλησης, της χειρουργικής, και φαρμακευτικής λοβοτομής και της λογοχειραγώγησης. Με αντάλλαγμα την επιβίωσή του και κάποιο κοινωνικό «κύρος».

Ο ψυχίατρος είναι ένας υπαλληλίσκος της εξουσίας στον οποίο έχει ανατεθεί ένας καταθλιπτικός και βρώμικος ενδιάμεσος εκτελεστικός ρόλος. Είναι μια τραγική ύπαρξη που κατασπαταλιέται και συνθλίβεται μέσα σε μια άλυτη αντίφαση που απορρέει απ' το υπαλληλικό καθήκον που της ανατέθηκε: Μια αντίφαση που εκφράζεται με την υποχρέωση του να αντιμετωπίζει ηθικά και πολιτικά προβλήματα, με δήθεν ιατρικές μεθόδους.

Can the coming Sovietization of American Dissent be stopped?

...by Preston James

One of the key trademarks of the Soviet Union which fell in 1989 (thanks to the secret negotiations of VT's own Lee Wanta) was its unwarranted detainment and persecution of dissenters in mental hospitals.

Some were arrested through mistakes and by complaints made by disgruntled neighbors, others because they spoke out even quietly against the Communist party practices or read western-published goods.

After the mass-murder of priests, Christians, doctors, lawyers and farmers, elaborate delusional rituals were concocted by the Soviet State to demonize dissenters in order to justify their frequent arrests, detainment, persecution and torture, with many sent to gulags for long

sentences.

These arrests, detainments and torture pleased the twisted, sadistic, cold-blooded, soulless Khazarian Communist party officials, who ordered such arrests and satisfied their demonic, satanic blood-lust.

Many Russian non-Khazarians were murdered outright, with many later sent to the Siberian Gulags for long sentences, where many died of various causes, such as malnutrition, starvation and disease. All this has been well-documented in Solzhenitsyn's classic book, Gulag Archipelago.

The Soviet System was founded on the promises of Marx to create equality for all and get rid of the privileged class, but ended up just the opposite.

The result was a small privileged ultra wealthy ruling class of Khazarian communist party officials, the mass-murder of many Russians, and followed by the persecution of non-Khazarian truth-tellers, other dissenters and millions of innocents.

...

But here is the bottom line to all this current use of Gladio False-flag ops, whether fake or real, these are "strategies of creating societal tension". The result Zios want is to create strong motivation in the public and the politicians to start mandating exigent police procedures which are completely unconstitutional.

These new procedures would allow the police to detain anyone who is accused by any authority, legitimate or not, appropriately trained or not, even a web service provider or any other poster. Any accusation against a person who posts dissent or whistle-blowing truth of being dangerous could then result in a call to the police, en exigent detainment in a psych ward for "observation and diagnoses".

Σάββατο, 17 Νοέμβριος 2018 00:22 - Τελευταία Ενημέρωση Σάββατο, 17 Νοέμβριος 2018 17:11

The desire here of the Zios is to see any dissenting author with alternative views or serious USG RICO crime disclosures, detained in a mental ward and have a full psychiatric evaluation (at their own personal cost of course, not the state).

Once this illegal, unconstitutional procedure is enacted, it will be easy to have Zio-controlled stooge psychiatrists or psychologists give the Zio-desired dangerous diagnoses, just as it was done routinely in the Soviet Union.

Here is an article that displays this new Zio motivation, since everything else they have tried has not only failed but backfired. They are getting increasingly desperate because they know their time is short. Why? Because the days of their US Petro-dollar being the world's reserve currency are now running out and will soon end.

The new obsession of the Ruling Cabal (Zios) is now to formulate and mandate their own imaginary "pre-crime intervention strategies" based on what anyone publishes on the Internet. This would come to be accepted by LE as accepted exigent circumstances practice and would constitute a powerful weaponization of their web censors, who will closely monitor all social media and even private emails. If successfully deployed, this will be targeted at MK-Ultra patsies at first; and then alternative press researchers, many of whom have already been demonetized and adversely censored in many ways, with their websites hacked and tampered with.

Numerous alternative media Internet articles and videos have been recently censored by youtube labeling them with "violent content" or "unacceptable content" when there is absolutely neither in them. Even new, supposedly non-censored video services on the net are using extreme warnings for video when not indicated at all either.

This is exactly the kind of labeling that was done in the Soviet Union, which used extreme measures to label, detain, and persecute dissent of any kind.

Turning Gurkhas into a new 'Victim Race'

The Gurkhas have long been an institutional expression of inequality: they were made and sustained, not by British decency, but by British racism.

The Gurkhas are a creation of Britain's old colonial policy of 'divide and rule'.

When British forces defeated Gurkha forces yet were impressed by their courage and tenacity. The Gurkhas were named a 'Martial Race' – that is, a race of people who were naturally brave, loyal and bloodthirsty. In the subcontinent under British rule from the early 1800s to the mid-twentieth century, the British tended to divide local peoples into two camps: 'Martial Races', those considered well-built for fighting, and 'Non-

Martial Races', those judged to have 'sedentary lifestyles' and thus to be unsuited to serving in colonial armies: too slothful, inactive, uncreative, lazy.

This discovery of 'Martial Races' occurred across the British Empire. Sikhs in India were also judged to be a 'Warrior Race' who could be trusted to join colonial armies in order to crush uprisings amongst the 'unruly' sections of Indian society; the Masai in Kenya were also judged a 'Warrior Race' when they were considered useful for shoring up British rule in Kenya. Not surprisingly, the distinction between Martial Races and Non-Martial Races corresponded neatly with those who generally supported British colonialism, or who benefited from it, and those who did not: in other words, behind the separation of Third World peoples into 'brave' camps and 'sedentary' camps, there lurked the low politics of divide and rule. The Gurkhas became more institutionalised into the British military than any other 'Martial Race', forming their own brigade and fighting in the First World War, the Second World War, the colonial wars, the Falklands, Kosovo and Iraq. They became the colonial people employed to put down other colonial peoples.

The Gurkhas were discussed in explicitly racial terms. For nineteenth-century British colonialists, the inhabitants of south Asia were, for the most part, a disgusting and unthinking mass, lacking the intelligence or humanitarian instincts of the white race. In the 1860s, one

Σάββατο, 17 Νοέμβριος 2018 00:22 - Τελευταία Ενημέρωση Σάββατο, 17 Νοέμβριος 2018 17:11

British officer said 'Asiatic soldiers' do not have 'the same pluck or moral courage as the European... unless drugged and maddened by opiates beforehand'. One British observer said Indians and other south Asians 'live in a different stage of civilisation and intellectual development... their only courage is apathy and their valour consists in animal ferocity. A native soldier, of whatever rank, has no heroism, and he is ignorant of honour in every acceptation of the word.' Gurkhas, by contrast, were considered not to be 'fully Asiatic', since they were brave and more loyal than other, non-heroic, dishonourable Asiatic peoples.

However, even when the Gurkhas were championed, it tended to be on the basis that their non-European racial features – their status as a Martial Race – made them perfect fighting machines. In the Victorian era, one writer said the great thing about the Gurkhas is that they do not have 'a very high estimate of the value of life'; they are 'less encumbered by the mental doubts or humanitarian sentiment [of Europeans], and thus not so moved by slaughter and mutilation'. This image of Gurkhas as peculiarly fearless and emotionless has been exploited by the British military and military historians right up to the modern period – and it has, as one critical author said in 1990, tended to 'deny the humanity of these soldiers'.

It is not merely New Labour thoughtlessness that has made these men second-class soldiers, but rather the long history of their cultivation as 'good wogs' whose lack of humanitarianism could be harnessed for British imperialist ends.
