### The Watch-Lists As A Means For Violating Human Rights

There are two kinds of countries: these which have established within their legislation the notion of the watch-lists and these which they have not.

Common sense, according to my opinion, dictates the conclusion that, the countries which adopt practically and legally the notion of watch-lists, they actually have not even one chance to survive

Currently, the international community is being dominated by the British settler-colonialism. And the cooperating countries (U.S.A., Russia, Israel and Turkey), according to undeniable historical evidence, they keep, for ages, abuse chemical, biological and other kinds of unconventional weapons for both, political oppression, as well as, for involuntary human experiments. Also, they are, literary, “champions” in perpetrating illegitimate gang-stalking against legitimate and innocent, political dissidents and human rights activists.

According to the well known settler-colonisers’ immorality, they do not hesitate at all to slander anyone, as crazy; as having cholera, or, aids, or, embola, or any other kind of trait able to cause the victim’s inclusion in a watch-list. And even worst, they are so ruthless that, if anyone of their victims dares to justly, deny the fabricated reasons for its inclusion in one or more watch-lists, the colonisers are willing and quite able to actually cause the related trait and/or sickness to their victims in order to unjustly vindicate themselves as slanderers.

For the above reasons and as far as the contemporary settler-colonialism keeps dominating the entire international-community, the watch-lists should be terminated at once.

However, in order for the appropriate authorities to rescue the citizens from the mere existence of these watch-lists, these authorities should, previously, become able to publicly pronounce notions like, claustrum-manipulating electronic brain implants, gang-stalking, settler-colonialism, RNM technology, human-rights, colonising non-uniformed army, directed-energy weapons, bioterrorism, etc.

Are, security authorities able and willing to pronounce publicly these notions, existing?

**P.S.:** The innocent citizens we are being facing the threat of unjustly becoming included within such watch-lists and then, if we find it out and complain, we shall face the threat of our lives becoming destroyed in order for the colonisers’ criminality not to become exposed. Are, the Security Authorities’ members, pretending ignorance about the essential of this issue in order to avoid becoming themselves unjustly included in any of these watch-lists?.
