## **Palestine-European Union**

The Israeli-settlers, while profoundly being “drugged and maddened with opiates beforehand” and backed by the American Empire, in Palestine, they are, arbitrarily, taking for granted that, both, the Palestinians’ land, as well as, the Palestinians’ lives, they belong to the Israeli-settlers and they act accordingly, meaning that they steal the land, they murder the Palestinians and they punish the living victims for avoiding their alleged retaliation. The Israeli-settlers, while profoundly being “drugged and maddened with opiates beforehand” and backed by the American Empire, in (a certain part of) Europe, they are, arbitrarily, taking for granted that, both, the Europeans’ (children and adult) organs and tissues, as well as, the Europeans’ lives, houses and businesses, they belong to the Israeli-settlers and they act accordingly, meaning that they steal the organs/tissues, they murder (by using plausibly deniable methods) the Europeans and they punish the living victims (e.g. life-long gang-stalking, directed-energy weapons, etc) for avoiding their alleged retaliation.

During the past six years, Israeli child organs-smugglers they harvested in Turkey the organs of

18,000 Syrian children and they murder them.

Both the European mass media, as well as, the European authorities of every kind, neglect to promote and resolve this widely known Turkish-Israeli monstrosity.

Simultaneously, the European authorities neglect to promote and resolve the widely known issues, of abusing mercury (and/or other MKULTA chemical compounds) for the illegitimate institutionalisation of mentally healthy children and adults and the perpetration of the food-chain's adulteration/poisoning as a means, of entryism, of bioterrorism, of plausibly deniable political assassinations, of genocide and of promoting the pharmaceutical/medical industry's enormous monetary profits.

These negligences combined and according to my opinion, they constitute evidence of complicity meaning, that certain European authorities know that, in Europe:

- European children/adults citizens' internal organs/tissues are being deliberately destroyed due to Israeli-settlers' entryism.
- European children/adults citizens' internal organs/tissues are being illegitimately harvested by israeli-settlers for smuggling.
- European children/adults citizens' buy from the black-market organs/tissues for transplantation.
- European children/adults citizens victims of involuntary organs/tissues harvesting are being tortured or murdered in order for avoiding an alleged retaliation against the Israeli-settlers.

Is there anyone who believes that, under these circumstances, peace, freedom, cooperation and frugal prosperity, could be enjoyed by the European citizens?

Is there anyone who believes that, under these circumstances, the civilisation could flourish in Europe?

Christos Boumpoulis

economist

P.S.: In case that, a legitimate and reliable authority provides me adequate protection, then, I would be delighted to publicly disclose, names and facts related to actual children organs/tissues harvesting in Greece. The current E.U.'s structure leaves, e.g. a victim of child organ-harvesting, like myself, equally with the Palestinians, unprotected to the Israeli-settlers' monstrosity. I resorted to every legitimate authority for rescuing my mother Olga Bompoulas

which is being kept hostage and being tortured because she is an eyewitness of children organs/tissues harvesting and of other crimes and no one did even the slightest thing to help her. The entire content of the present article is known to the European citizens the lacking of reaction of which designates the quality of their future lives.
