Smuggling Child Testicles and Child “Guinea Pigs”

For decyphering the current developments within the international community, certain “key” information needs to having been previously comprehended.

The settler-colonialism, by definition, is being perpetrated by “drugged and maddened with opiates beforehand” members of a colonising-settlers’ army.

Being “drugged and maddened with opiates beforehand”, by definition, means suffering from erectile-dyfunction and/or pseudo-homosexuality.

Being “drugged and maddened with opiates beforehand”, by definition, means being, more or less, mad.

Furthermore, suffering from erectile-dyfunction and/or pseudo-homosexuality means, from a settler-colonialism’s perspective, low capacity to be effective.

And being, more or less, mad means, from a settler-colonialism’s perspective, also low capacity to be effective.

During the past many decades, according to sufficient indications and according to the settler-colonialism’s mind-set, the erectile-dyfunction and/or pseudo-homosexuality, they were corrected by child-testicle’s transplantations.

And again, during the past many decades, according to sufficient indications and according to the settler-colonialism’s mind-set, being mad was corrected by brain-implanting electronic-implants and transhumanisation.

For the development of the electronic-implants, mentally healthy children, also from Greece, were involuntarily abused.

For the testicles' transplantations healthy children, also from Greece, were involuntarily harvested.

The contemporary settler-colonisers are lacking what it takes, namely civilisation, in order to confess their monstrosities and voluntarily be accountable for them. Consequently, they fabricate all the quasi “soap-operas” which the “Mockingbird” mass media happily propagate, in order to avoid collecting the, unavoidable, negative consequences of their crimes. And even worst, they exterminate, in many ways, the survived victims/eyewitness in order for them not to press criminal charges against the settler-colonisers.

Coccluding, I wish to express my belief that, as far as, the international community, actively or not, consciously or not, keeps vastly and unjustly supporting the settler-colonisers and inhumanely and unjustly deserts their survived victims, that far, the international community shall keep lacking; peace, freedom, cooperation and prosperity.
