Legal Evidence of My Illegal Brain Implanting (upd)

Update:

22/01/2020 06:15: Here are my, so far and uncertain, findings about how to deactivate the involuntary electronic brain-implants, to be used by each one's own responsibility: 1. do not destroy the electronic brain-implant with neither electromagnetic-pulse nor with microwaves, as it may cause a lethal leaking of chemicals from its battery. Instead, 2. buy a "monitor mode" capable wifi dongle like the TP Link 300Mbps Mini Wireless N USB Adapter 3. find the brain-implant's Mac-addresses by using the software application "Scapy", 4. Use "Scapy" for continuously monitoring these Mac-addresses and in case they "connect" to any other wifi network-nodes then issue immediately a deauthendication command in order to disconnect the brain-implant. Slavery is illegal and inhumane thus propagate this knowledge for contributing in liberating victims of involuntary brain implanting.

By this article I wish to announce my possession of legal evidence about my involuntary and illegal electronic, remote neural monitoring and clausrum manipulating brain implanting; an to denounce the British MI5 as the instigator of this heinous crime. The Greek minister of citizens protection Mr. Michalis Crysochoidis has the names of the Greek perpetrators.

Recently, my network of informers notified me that my electronic brain implant in order to communicate, it uses the WiFi communications protocol.

In order to gain legal evidence about its existence, I bought a TP Link 300Mbps Mini Wireless N USB Adapter, because it has the technical capability to enter the "monitor mode" of operation and I installed in my personal computer the software application "Scapy".

By using my equipment I discovered the hidden WiFi wireless networks that my brain-implant was using and the Mac-addressess of the corresponding electronic nodes. These Mac-addressess are the followings:

00:1A:70:7B:3F:26

For what it may worth, I denounce the United Kingdom as a perpetrator of monstrocities related to involuntary, electronic brain implanting.

The British, in the past, they totally genocided the, essentially, defenceless Tasmanian Nation.

Also, they involuntarily brain implant 13 years old children, like then myself.

Whoever associates himself with the British can not claim that he or she is better than the British.

And whoever illegitimately persecutes the innocent victims and eyewitnesses of the British monstrosity in order to shut their mouth and to destroy them, he or she is nothing else but a common criminal.

Christos Boumpoulis
