### Information-Asymmetry Gang-Stalking Settler-Colonialism

The settler-colonialism perpetrates the crime against humanity of the Apartheid in order to make the indigenous population become genocided by the colonising-settlers.

Accordingly, targeted indigenous individuals are being gang-stalked by colonising-perps (perpetrators).

During the gang-stalking, among many other patterns of framing, the victim's behavior in being manipulated by stimuli, which they are overt to the victim and covert to all the bystanders, in order for, under circumstances of asymmetric information, slandering the victim e.g. as a false "mental case".

For example, after 42 years of my being gang-stalked, I learned to recognise the criminals, which perpetrate gang-stalking and which unavoidably they share certain observable traits, with a probability of around 95%. And after having spent, literally, most of my adult years studying in university libraries, I learned to recognise the university students, which unavoidably they share certain observable traits, with a probability of around 95%.

Therefore, I imagine that it is both accurate and just to argue that, for me, discriminating between, the university students from the colonising-criminals seem as being so easy as, literally, discriminating between, white doves and the contents of an ordinary cesspit.

Also, I am deeply informed about the systematic and illegal usage, on behalf of the colonising-settlers against innocent targeted individuals like myself, of the directed-energy (microwave) weapons and its devastating consequences against the human brain; which I consider as being invaluable (typically, value\_of\_brain = infinite euros).

Some time ago I was at an European university's library which was specialised in the Robotics and I was studying related scientific books.

After a short initial period, a recognisable by me "perp", carrying a bag with unknown content, came and sat near me.

Rationality dictates that, in such an occasion, the mathematical hope, of the value if the outcome of choosing to retain the same position, should be employed:

let

pp: probability (=95%) of accurate identification of the "perp".

pm: probability of a directed-energy weapon carried in its bag.

vb: value of my brain (typically = infinite euros)

## Information-Asymmetry Gang-Stalking Settler-Colonialism

Συντάχθηκε απο τον/την Χρήστος Μπούμπουλης (Christos Boumpoulis)

Κυριακή, 26 Ιανουάριος 2020 02:43 - Τελευταία Ενημέρωση Κυριακή, 26 Ιανουάριος 2020 03:56

---

Therefore, the mathematical hope of the cosequences of my potential decision not to move away from the "perp" is equal to,

$pp \times pm \times (-1) \times vb =$

$0.95 \times pm \times (-1) \times infinite = - infinite$

This practically means that, when the integrity of one's human brain is being threatened (Alzheimer) to any degree, by directed-energy weapons, the rational reaction is, for him or her, to immediately move away. The brain can not be repaired if it becomes cooked by microwave weapons, thus it is rational to avoid any degree of risk of the brain to become irreparably damaged.

The gang-stalkers know this and also, they make sure that they are going to be identified by the victim and not by the bystanders (asymmetric-information).

At the library, they were letting me to consentrate on my books for arround four minutes and a new "perp" was coming to harass me and make me change my position within the library. And this psychological torture lasted for around eight hours during which I noticed that I was being videotaped by an unknown to me individual.

Despite all this "no-touch" violence, I succeeded in gaining the knowledge that was required by the project I was preparing at that time though at the next day I had, for precautionary reasons, to depart towards a neighbouring State.

Similar criminal exploitation of information-asymmetries, regarding e.g. adulterated "watch-lists" and remote neural monitoring and claustrum manipulating brain-implants, could be also weaponised

Concluding, as far as, the settler-colonised Nations they neglect terminating the gradual destruction of their own Nation, that far, the settler-colonisers shall keep criminally exploiting existing information-asymmetries in order to destroy indigenous individuals which they, arbitrarily, dislike.

Christos Boumpoulis  
economist

P.S.: For obvious reasons, the security authorities are able to easily identify the colonising-criminals who perpetrate the gang-stalking and who perpetrate illegal assaults with directed-energy weapons against innocent civilians. In the Internet there are hundreds or even thousands of named and public testimonies of similar incidents of gang-stalking like the above incident at the European university library. And there are, the dictatorship in Greece, the "Huge Cooper & Co" treaty treason, the genocide/apartheid against the Palestinians, the harvesting of the 18,000 Syrian children, the Russian tyranny against Europe, the "cancer" "epidemic", the opiates "epidemic" and all the rest. Why, the Europeans they do not wake-up? During 2014 two of my reliable Greek informers notified me that, a. the settler-colonisers were going to use microwave weapons in order to make me stupid and b. for protecting myself I should find a house to stay.

### Appendix

#### Information asymmetry

In contract theory and economics, information asymmetry deals with the study of decisions in transactions where one party has more or better information than the other. This asymmetry creates an imbalance of power in transactions, which can sometimes cause the transactions to go awry, a kind of market failure in the worst case. Examples of this problem are adverse selection, moral hazard, and monopolies of knowledge.

Information asymmetry extends to non-economic behavior. As private firms have better information than regulators about the actions that they would take in the absence of a regulation, the effectiveness of a regulation may be undermined. International relations theory has recognized that wars may be caused by asymmetric information and that "Most of the great wars of the modern era resulted from leaders miscalculating their prospects for victory". There is asymmetric information between national leaders, wrote Jackson and Morelli, when there are differences "in what they know [i.e. believe] about each other's armaments, quality of military personnel and tactics, determination, geography, political climate, or even just about the relative probability of different outcomes" or where they have "incomplete information about the motivations of other agents".

Information asymmetries are studied in the context of principal–agent problems where they are a major cause of misinforming and is essential in every communication process. Information asymmetry is in contrast to perfect information, which is a key assumption in neo-classical economics. In 2001 the Nobel Memorial Prize in Economics was awarded to George Akerlof, Michael Spence, and Joseph E. Stiglitz for their "analyses of markets with asymmetric information".

#### Mathematical hope - Expected value

The predicted average gain or loss is called expectation or expected value and is the sum of the probability of each possible outcome of the experiment multiplied by its payoff (value). Thus, it represents the average amount one expects to win per bet if bets with identical odds are repeated many times. A game or situation in which the expected value for the player is zero (no net gain nor loss) is called a fair game. The attribute fair refers not to the technical process of the game, but to the chance balance house (bank)–player.

Κυριακή, 26 Ιανουάριος 2020 02:43 - Τελευταία Ενημέρωση Κυριακή, 26 Ιανουάριος 2020 03:56

---

There are people in large metropolitan cities being stalked, harassed, mobbed, and followed around and many do not know why. Many are having to change jobs, move constantly, have their lives disrupted and they can't find help or assistance for what is happening to them. Many are stumbling in the dark and being misled by those around them. I hope to the best of my ability to shed a little bit more light on what is happening and help others better start to find help and assistance.

I am looking for volunteers who are willing to assist innocent people in major cities who are being targeted by covert government investigations. These investigations have been masked for the last few years online under the title of gang stalking.

This is what is happening and this is why these people need your assistance with getting in touch with the right channels. Many people who are going to be reading this article are probably a part of these programs and many people probably do not realise the damage they are doing to others. Here is some information that you need to know.

What is gang stalking?

Gang stalking is a modern day form of the Cointelpro program, that ran in the United States and in other countries under different names. Eg. In Canada it was called V.I.P.S. It's also a part of the New Community Based Policing efforts combined with the reemergence of Police Red Squads, which have been in existence on and off for close to a hundred years.

The new forms of these programs combines the organised stalking and mobbing of the targets of these programs that take place primarily in the targets community. What will happen is that files will be opened on targets of these harassment programs, and the State or officials of the State, such as the FBI, CIA, RCMP, CSIS, or local police will go around and tell the friend, family, co-workers, landlords, and community of the targeted individual at large is under investigation. They will say that the target is a terrorist, crazy, drug dealer, someone who needs to be watched. They will ask for, or in many cases force the corporation of the targeted individual till the target becomes increasingly more cut off from their sources of support, making it easier to harass and psychologically harm them over time.

" The new versions of these programs use the community based policing programs to help with the stalking and monitoring of the targeted individual, that is why the target will complain of being followed around in public by strangers they do not know. They are being followed around by the new eyes and ears of the state, their fellow citizens who for various reasons have decided to become informants for the state. This is happening in many democratic countries and cities.

Other names for Gangstalking

There are many names for this form of harassment, it would also now seem that Gang Stalking is a term that was invented as part of the disinformation campaign that the government is good at putting together while these harassment campaigns are running. Some of the more popular names for this form of harassment have been Cointelpro, Red Squads, and now with the new

---

community based policing programs we have names coming up such as: Multi stalking, vengeance stalking, cause stalking, stalking by proxy, organised stalking, organised harassment, group stalking, community mobbing. These are the new names being given to a very old game, that is once again being played by the government on it's unsuspecting citizens.

Who gets targeted?

Gang stalking can happen to anyone, but it's being widely used on minorities, outspoken individuals, whistle blowers, dissidents, people who go up against large wealthy corporations, woman's groups, (single) women, anti-war proponents, and other innocent individuals. The majority of the targets are not aware this is happening to them and it continues for years. Even when a target moves, changes jobs, the harassment still continues. Every time the target moves, the government, or the local intelligence unit of the police will follow them around and start to spread the same lies, and slander to their new employers, coworkers, landlords, etc.

What are the goals of this campaign?

The goal is to isolate the target from all forms of support, so that the target can be set up in the future for arrest, institutionalisation, or forced suicide. Other goals of this harassment include sensitize the target to every day stimuli's as a form of control. These people also want to make the targets of this harassment vulnerable, they want to make them destitute. The secondary goals seem to be to make the target homeless, jobless, give them a breakdown, and the primary goals seems to be to drive the target to forced suicide, just like what they did with some of the targets of Cointelpro.

Who gang stalks?

People from all walks of life are being recruited to be the eyes and ears of the state. People from all races, ages, genders and walks of life. You have your garden variety snitches, you have general labourers, the very wealthy, biker, drug dealers, user, street people, punks, hip hop culture, KKK, black activists, church groups, youth groups, every sector of society that you can think of is a part of this. The ages range from five to eighty five and older.

The surprising thing is that gang stalkers can be found in every level of society. There is no real age barrier, gender barrier, and a variety of races do participate. In almost every occupation in society you can find people who are going along with this.

Gang stalking for some is seen as a game of cat and mouse. They see themselves as heroic spies for the state. Some are just power hungry slithering money hungry snitches, who would sell their mothers down the drain, much less innocent people. Other are asked and do it out of a sense of patriotic duty, others are forced to take part in the spying activity. Many do not understand or care that the end consequence of this game is to destroy a person.

Why people take part?

## Information-Asymmetry Gang-Stalking Settler-Colonialism

Συντάχθηκε απο τον/την Χρήστος Μπούμπουλης (Christos Boumpoulis)

Κυριακή, 26 Ιανουάριος 2020 02:43 - Τελευταία Ενημέρωση Κυριακή, 26 Ιανουάριος 2020 03:56

---

There are many reasons that someone takes part in this activity.

1. Some do it for the sense of power that it gives them.
2. Others do this as a way to make friends and keep friends. It's something social and fun for them to do.
3. Other are forced or black mailed or forced by the State or the police into taking part.
4. They are told that they are part of homeland or national security and being used to help keep and eye on dangerous individuals.
5. Others are just local thugs or informants who are already being used for other activities, and their energies are just diverted over into these community spy programs. Eg. Some may be given the choice of Spying for the State or the police vs going to jail.

Where does gang stalking occur?

This harassment occurs out in public, as well as in private. The goal of this modern day Cointelpro program is to have the target under stress 24/7. Once a person is chosen for this harassment the police or the state are quick to start an investigation into their lives. They will find out everything about a target. Where they live, who their friends are, their family, where they work, where they shop, their most intimate habits. Then they will try to get into every aspect, and I do mean every aspect of a targets life. They will even try to wiretap phones, link into cell phone signals, monitor Internet activity, divert mail and email. They hijack your life, they want you to feel like they are in charge of your life 24/7. They also want you to know this is going on, it's a way to psychologically immobilise and cripple a target. The people around you who you thought you could once trust, are forced to keep quite and often take part in this ritual of a thousand paper cuts that is designed to destroy the target over time.

Techniques Used

A large part of this harassment involves psychological harassment of the targets. To achieve this a profile of the target is gathered and then a program of harassment is implemented using many of the methods below.

Brighting

As targets walk on the street, usually at night, Suburban Spies will turn on their high beams. This might be flashed once or twice at targets. The idea is to intimidate the target and let them know they are being watched at all times.

Crowding/Mobbing

When the target is in public, Suburban Spies will usually try to box the target in. Eg. They will surround the target in a square like formation if possible. They will stand too close to the target,

## Information-Asymmetry Gang-Stalking Settler-Colonialism

Κυριακή, 26 Ιανουάριος 2020 02:43 - Τελευταία Ενημέρωση Κυριακή, 26 Ιανουάριος 2020 03:56

---

or swarm them.

### Directed Conversations

These are conversations that complete strangers will have out in public relating to the target and their personal situations. Eg. They will repeat things a target said in their home, or on the phone. They will let drop very personal details into the conversation, that could only be related to the target.

Eg. Suburban Spy1. It's a shame Uncle Ed won't be able to come.

Suburban Spy 2. Yeah since he died golfing on Saturday.

The target will just have learned of a death of a favored uncle, (possibly named Ed.) while out golfing.

### Directed Energy Weapons

Electronic Harassment. Usually when they feel they have psychologically targeted a target to where they are near breakdown they will start to use these weapons. They will also use these weapons if targets are not going along with their harassment protocol.

### Investigation Files

It has been indicated that targets will have files shown to relatives, store keepers and friends. The files are usually not left behind, but they are used to show legitimacy and to further slander targets. They are also used to get the participation and corporation of the people in the targets life, with their harassment.

The files might have a picture of the target, and lies or slanderous information about some alleged crime that they might be responsible for. The information is not true, but it's usually very convincing and helps to further get targets harassed by those around them.

### Gaslighting

Doing little things to try to make the target think that they are going crazy.

Coming into their homes, moving their furniture around.

Changing clothing that they bought and replacing it with similar, but inferior items.

Taking small items and then replacing them later on.

### Gassing/Poisoning

Spraying fumes or scents into a targets home. Tampering their food to make them become very ill.

### Illegal Entry

## Information-Asymmetry Gang-Stalking Settler-Colonialism

Συντάχθηκε απο τον/την Χρήστος Μπούμπουλης (Christos Boumpoulis)

Κυριακή, 26 Ιανουάριος 2020 02:43 - Τελευταία Ενημέρωση Κυριακή, 26 Ιανουάριος 2020 03:56

---

To gas light the target.

It's used to help profile the target.

To set up illegal surveillance.

It's a way to find out intimate details about the targets. This can be used later to set up the target by using people in photo albums, or by directed conversations about things in the targets apartment.

### Illegal Surveillance

This involves setting up audio and visual surveillance of the target.

Bugging the targets phone, or using external listening devices.

Video surveillance inside or most likely outside of the targets residence

Listening to cell phone and hard line conversations.

Hacking into their computers and learning all about what the target is doing, sites they frequent.

This also helps to build a profile of the target, and it's also used for later psychological attacks against the target.

### Illuminating Targets

This is something that the East German Stasi secret police did to targets. They would spray the targets clothing with materials that would make them glow, or they would irradiate the targets with X-rays so that they glowed in the dark.

There are harmful and harmless chemicals that will achieve this effect.

### Read Story

#### Intimate Infiltration

This is where Suburban Spies will go out of their way to get into a targets life. They will try to form friendships with targets. They will try to form intimate relationships with targets.

They will get close to people that are affiliated with targets. Years before the target ever realises they are targets they will try to get into a targets life.

Eg. If they can't get into your life, but you have a best friend, their new significant other might just be a Suburban Spy. The same goes for siblings and the people that enter their lives.

#### Isolation

For this harassment to be successful, it's important to be able to isolate the target from friends, family members, co-workers and even spouses. To accomplish this isolation many methods are used included, but not limited to: slander, lies, files, sabotage, anything that will get the target into a situation where they have no support system. This is important for this Cointelpro like harassment to succeed.

## Information-Asymmetry Gang-Stalking Settler-Colonialism

Συντάχθηκε απο τον/την Χρήστος Μπούμπουλης (Christos Boumpoulis)

Κυριακή, 26 Ιανουάριος 2020 02:43 - Τελευταία Ενημέρωση Κυριακή, 26 Ιανουάριος 2020 03:56

---

### Mail and Email tampering

Suburban Spies will steal your mail. They will delay the delivery of your mail, and they will also make sure that your mail does not arrive. The other thing they are known for is the tampering of email. They will delay email, delete email, and stop email that you have sent from arriving

### Mimicking

This is trying to copy things in a targets life.

Leaving when they do.

Dressing like they dress.

Throwing out the garbage

Going to the bathroom

Doing whatever the target is doing.

This is all designed to be psychological warfare, so that the target again feels like they are under observation at all times.

### Profiling

Targets will be observed and profiled long before they ever become aware that they are targeted for this sort of harassment. Profiles will be created on targets by:

Following them.

Following people close to them.

Breaking into their homes and going through their stuff.

Listening to their calls.

Hacking into their computers.

Gathering information from friends, and family.

Seeing where they like to shop and eat.

What are their weaknesses?

What things do they like and dislike?

This will all be used to put together a profile of the target and then to get them into situations for their detriment.

### Random Encounters

This will be people on the street who you randomly and unexpectedly run into. It looks completely natural and it seems to be a random encounter.

They might ask for your phone number after engaging you in conversation. Ask you out, or just ask you where you are going. Anything from small talk to lengthier conversations.

All with the purpose of finding out something about you, or even just getting you to do

## Information-Asymmetry Gang-Stalking Settler-Colonialism

Συντάχθηκε απο τον/την Χρήστος Μπούμπουλης (Christos Boumpoulis)

Κυριακή, 26 Ιανουάριος 2020 02:43 - Τελευταία Ενημέρωση Κυριακή, 26 Ιανουάριος 2020 03:56

---

something.

### Ruined Relationship

When targets are in a relationship, the Suburban Spies will try to ruin that relationship. This could be friendships, family or significant others.

If it's a romantic relationship, they will find out what your significant other likes and try to get them to cheat, or leave you.

If it's a friendship they will tell lies to come between you. The same goes for family. This is done so that targets will have no means of support, once they do realise that something is going wrong in their lives.

### Sensitization

This is getting targets sensitive to an everyday stimuli. Eg. Colors, patterns or everyday actions. Eg. Red, stripes, pens, whistles, loud coughing, clapping, waves, keys jingling.

Eg. Joe will be mobbed at work and as part of that daily mobbing his coworkers will loudly cough at him every time they harass him by calling him names like loser, worthless, lame, demented. They will slander him and have others as they are slandering him show disgust by glaring and coughing at him.

Out in public they will follow him loudly and obnoxiously coughing at him. When he goes to stores they will get others to do the same. After months or years of this, Joe has become sensitive to this stimuli and it can be used to harass him without the names and the glaring looks. The association has been formed because of all the other harassment.

Eg. A girl is sexually assaulted and a sock is shoved in her mouth , during the assault. To keep her quiet or stop her from pressing charges, the assailant, his friends and family will follow her around and throw socks in her path, mention it everywhere she goes and show her their socks every chance they get. She will get the message they are sending. Because of the brutal attack, she and what's happened after she is now sensitised.

### Signals/Symbols

It has been said that Suburban Spies in some states will have gang decals on their cars and trucks.

They will also communicate with each other on the street by using Statsi like signals. Below are some examples. SIGNALS FOR OBSERVATION

1. Watch out! Subject is coming - touch nose with hand or handkerchief
2. Subject is moving on, going further, or overtaking - stroke hair with hand, or raise hat briefly
3. Subject standing still - lay one hand against back, or on stomach

## Information-Asymmetry Gang-Stalking Settler-Colonialism

Συντάχθηκε απο τον/την Χρήστος Μπούμπουλης (Christos Boumpoulis)

Κυριακή, 26 Ιανουάριος 2020 02:43 - Τελευταία Ενημέρωση Κυριακή, 26 Ιανουάριος 2020 03:56

---

4. Observing Agent wishes to terminate observation because cover threatened - bend and retie shoelaces
5. Subject returning - both hands against back, or on stomach
6. Observing Agent wishes to speak with Team Leader or other Observing Agents - take out briefcase or equivalent and examine contents.

The new breed of stalkers will use signals that might be based on a one handed sign language called talking hands used by the police. They will use signals like the double blink to say that they understand. Squeezing the nose to say I know, or for pointing and directional signal, touching the eyes to indicate they are on watch or to watch the target, brushing the hair back three times, or covering the mouth or pretending to yawn, to begin communication.

### Slander

They will go behind the targets back and tell lies about them. Often the lies will consist of the target being into something illegal, or is someone dangerous, or just needs to be watched for some vague reason. This was used in Cointelpro and it was very effective in ruining the lives of many targets.

Eg. They will say the target is crazy, a terrorist, drug dealer or user, a prostitute, gay, racist, pedophile, etc.

### Sleep Disturbance

Depriving the target of sleep is a really good way of leaving the target stressed out. It's also a way of leaving them disoriented and functioning at less than 100%. Then the targets can be baited into reacting in public, or getting into a car accident.

### Strange Encounters or Street Theatre

This is running into people that are acting very unusual, or people that are putting on a show or production, known as street theater.

Eg. This could be as minor as public rudeness, or people acting out a skit or skits for your benefit. There will usually be someone near by to see how you react to it. This is again looking for weakness or reactions. If you show an adverse reaction they will try to embellish on this and use it against you later on.

### Telephone Redirects

When you make a telephone call, get the name and ID of the person that you are speaking to. Suburban Spies have been known to redirect phone calls. This means that when you dial a number they will intercept that phone call and pretend to be the service or repair person you were trying to call. Eg. If you call the cable company, gas or phone company be sure you know that it's actually them that you are speaking to.

## Information-Asymmetry Gang-Stalking Settler-Colonialism

Κυριακή, 26 Ιανουάριος 2020 02:43 - Τελευταία Ενημέρωση Κυριακή, 26 Ιανουάριος 2020 03:56

---

### Theft

Breaking into a targets home and taking small items, usually nothing of value. However there are exceptions to every rule. Suburban Spies will usually try to see what they can get away with.

### Tracking

The targets are tracked by various methods.

Targets are tracked on foot by foot soldiers.

They are tracked in their cars.

Targets can be tracked by using their cell phones. If their cell phone number is known, there are Internet programs that will track a target to within a few feet.

GPS tracking on their cars and laptops. These are all ways that targets are tracked where they go and their activities monitored.

### Vandalism

If the target owns property this can be as simple as broken door handles, knobs, to actual slashing of tires. They will also break in and do small damage to items the target owns. Eg. If you buy a new sweater, they might break in and cut holes in it. Holes in undergarments.

If you go to a store to get a repair done check for damages. This goes for boots, and coats. Eg. Zippers and the heels of long heeled boots.

### Wrong Number Calls

Targets will daily get wrong number calls. These can be automated or they can be persons pretending to be wrong number calls. Suburban Spies will use this as a way to annoy targets, but they will also use this as a way to keep in constant contact with their targets. They want to know where the target is at all times.

Effects of Cointelpro, Red Squad, Community Policing, gang stalking.

1. The target become hypersensitive, and yes in many cases paranoid. They can not understand how so many people could be doing this. The idea after all is to make them seem crazy when they try to get help, or tell others this is happening to them.
2. Targets become depressed and isolated, which is the key goal. If you don't isolate the target it can not work.
3. Targets becomes sensitised to stimuli. Colors, patterns, noises, actions, etc. Targets have their reputations ruined and destroyed due to slander campaigns, which are a big part of the harassment protocol. They want the targets credibility to come into question. The target apparently is unaware, but everyone else gets in on the action.

### Fighting the new Cointelpro and Red Squads, AKA. Gang Stalking

Like other forms of harassment, it comes down to the what can I get away with factor. Here are some things that you can do to fight or bring awareness to the issue of gang stalking.

1. Write an article of share your story about the new Cointelpro.
2. Educate yourself and those around you about Cointelpro and Red Squads.
3. The more people that know the better. Many members of society participate in this, without realising what they are really being a part of.
4. We need to get laws in place to fight this type of harassment.
5. Do not go along with this Cointelpro activity. Try to find ways to help the target.
6. Educate others that Cointelpro is wrong. Red Squads are police harassment.
7. Have open discussions about Cointelpro, Red Squads, Community policing and harassment.
8. Cointelpro is illegal, even when the police won't help, it's still illegal.  
Take action on the new Cointelpro and the reemerging Red Squads for yourself and other targets.
9. We need local news paper articles, online articles.
10. We need postings on forums and other places of popularity.
11. Email awareness.
12. We need flyer's.
13. We need websites, making as many people aware of this as possible.
14. We need law suits period.
15. We need support from community based organizations worldwide.
16. People need easy access to their freedom of information records.
