The recent agreement with Italy about the EEZ is treasonous and invalid. Italy's claims, about alleged historical fishing-rights at the international waters, they are ridiculous. Probably a metallic fence should be erected between the two countries for obstructing the Italians from stealing the Parthenon.

France attempts to sell to Greece a very expensive warship that can be easily sunk by a cheap missile. Maybe this is the reason for France's extreme dislike against the indigenous Greek political dissidents.

Any agreement with Egypt which might transfer to them Greece's EEZ, shall be invalid.

For Greece's temporary, military defence the appropriate, meaning the "good ones", German missiles should be bought.
