Message to the Bundeswehr – Covid-19

Due to the Covid-19 pandemic, the German economy was forced to a “lock-down” state.

The measures which were imposed in order for preventing the further propagation of the pandemic, they make the German citizens unhappy and they cause damage to the German economy; and for this reason, the Covid-19 must be terminated.

The Covid-19 is a virus.

According to the Dr Royal Rife's methodology, the Covid-19 virus must have a specific frequency which makes him to resonate. And by using a "Rife machine", this virus can become destroyed.

Consequently, I kindly request from the Bundeswehr to use, as soon as possible, e.g. the John Bedini's "RPX sideband generator", coupled with a coil, in order to examine whether, a specific frequency can be traced, or, the frequency sweep-mode is adequate, for terminating the Covid-19, and restore normality in everyday life, in Germany.
