Secret trial

A secret trial is a trial that is not open to the public, nor generally reported in the news, especially any in-trial proceedings. Generally no official record of the case or the judge's verdict is made available. Often there is no indictment. The accused is usually not able to obtain the counsel of an attorney or confront witnesses for the prosecution, and the proceedings are characterized by a perceived miscarriage of justice to the benefit of the ruling powers of the society.

In the English-speaking world, one of the most notorious secret courts was the Star Chamber as it was used under Charles I in the early 17th century. The abuses of the Star Chamber were one of the rallying points of the opposition that organized around Oliver Cromwell, and ultimately resulted in the execution of the deposed king. The term "star chamber" became a generalized term for a court that was accountable to no one (except the chief executive) and was used to suppress political dissent or eliminate the enemies of the regime.

Secret trials have been a characteristic of almost every dictatorship of the modern era, but even in democratic regimes secret trials have taken place, usually cited by state authorities as necessary for the same reason as those in dictatorships—national security. Although the Great Purges in the Soviet Union under Joseph Stalin are best remembered for the Moscow Trials, show trials in which the court became a parody of justice, most of the victims of the Terror were tried in secret. Mikhail Tukhachevsky and his fellow Red Army officers were tried in secret by a military tribunal, and their executions were announced only after the fact. The presiding judge of the Moscow Trials, Vasili Ulrikh, also presided over large numbers of secret trials lasting only a few minutes, in which he would quickly speak his way through a pre-formulated charge and verdict.

Open Letter to the EUHR Plenary Court's Members

Gentlemen/Ladies,

Greece remains under a dictatorship and an occupation, responsible for which, are the

contemporary settler-colonising Nations, U.K., U.S.A., Russia, Israel and Turkey.

The innumerable, innocent and kind Greek citizens suffer, more or less, like the German hero Karl-Heinz Richter did, during the GDR era; though the means of torture have been modernised.

By your recent electing a Greek judge as the European Court for the Human Rights' president, you legitimized Greece's criminal political regime.

Hashish, always existed in the past and almost certainly it shall exist, also, in the future. Therefore, dictatorships are going to evolve, now and then, as they did in the past.

However, people who find themselves having fallen down, like my fellow Greeks; like the murdered members of Greece's natural leadership; like those who are being tortured, made ill, crippled, exiled, unjustly imprisoned or institutionalised or marginalised or slandered, etc., expect from their defenders, to honor their vows; to fulfill their duties, and rescue them; and not to, literary, shell them to the colonisers as if they were mere meat.

Sincerely,

Christos Boumpoulis

economist
