Legal Notice 131

The contemporary political dissidents are advised to read carefully this legal notice, though an arbitrary and trivial insident inspired its contents.

Legal Notice 131 (corrected)

Earlier, today, at the parking area of a supermarket, I asked a question to an unknown to me pedestrian. And after 3 minutes, that pedestrian stopped his car, while he was leaving with his car, beside me and through his open window he asked me, “do you know Jesus?”. I replied, “Yes, Jesus Christ, God”. And finally he added, “Jesus loves you very much, God Bless you”, and departed with his car.

During politically turbulent historical periods, hypothetically, by using the Audacity computer software for voice editing the above dialog, the question, “do you know Jesus?” could very easily become replaced by the fabricated question, “what is your name?”. And then, as Dr Robert Duncan disclosed, “The government targets, tortures, murders them, implants, irradiates, or uses chemicals or other tactics on citizens, covering it up by having involved state employees, police, and doctors deliberately keep details and accusations off the record. A record can be tainted so badly, it does not appear to have any of the facts on it and complete independent analysis must be done”.

Therefore, any unrelated remarks/question that may be addressed to political dissidents, they should alarmed them instantly.

Audacity (audio editor)

Audacity is a free and open-sourcedigital audio editor and recording application software, available for Windows, macOS/OS X and Unix-likeoperating systems. Audacity was started in the fall of 1999 by Dominic Mazzoni and Roger Dannenberg at Carnegie Mellon University and was released on May 28, 2000 as version 0.8.

As of October 10, 2011, it was the 11th most popular download from SourceForge, with 76.5 million downloads. Audacity won the SourceForge 2007 and 2009 Community Choice Award for Best Project for Multimedia. In March 2015 hosting was moved to FossHub[11]and by May, 2019 it had exceeded 73.3 million downloads there.

To whitewash is a metaphor meaning "to gloss over or cover up vices, crimes or scandals or to exonerate by means of a perfunctory investigation or through biased presentation of data". It is especially used in the context of corporations, governments or other organizations.

The government targets, tortures, murders them, implants, irradiates, or uses chemicals or other tactics on citizens, covering it up by having involved state employees, police, and doctors deliberately keep details and accusations off the record. A record can be tainted so badly, it does not appear to have any of the facts on it and complete independent analysis must be done.
