## **Rescue Greece's Gypsies – International Call**

Due to its 60 plus trillion euros worth mineral wealth, Greece is suffering, since the WW2 ending, from settler-colonialism.

Within this context, the British racism has quasi “weaponized” the Greece’s Gypsies, in a similar manner like they did to Gurkhas, and has enlist them in Greek resource extraction’s projects. And by this way, the crime against humanity of Apartheid is being perpetrated in Greece within which, also the Gypsies, they have been, forcibly, turned against the indigenous Greeks.

The human life is sacred and invaluable. The Gypsies are human beings. Therefore, the lives of, also, the Gypsies are sacred and invaluable.

Concluding, I wish to address a call towards the international community to do its duty and rescue the Greece’s Gypsies from the contemporary settler-colonialism’s ruthlessness.
