Character assassination (CA) is a deliberate and sustained effort to damage the reputation or credibility of an individual. The term could also be selectively applied to social groups and institutions. Agents of character assassinations employ a mix of open and covert methods to achieve their goals, such as raising false accusations, planting and fostering rumours, and manipulating information.

Character assassination happens through character attacks. These can take many forms, such as spoken insults, speeches, pamphlets, campaign ads, cartoons, and internet memes. As a result of character attacks, individuals may be rejected by their professional community or members of their social or cultural environment. The process of CA may resemble an annihilation of human life as the damage sustained can last a lifetime. For some historical figures, that damage endures for centuries.

CA may involve exaggeration, misleading half-truths, or manipulation of facts to present an untrue picture of the targeted person. It is a form of defamation and can be a form of ad hominem argument.

The phrase "character assassination" became popular from around 1930. This concept, as a subject of scholarly study, was originally introduced by Davis (1950) in his collection of essays revealing the dangers of political smear campaigns. Six decades later Icks and Shiraev (2014) rejuvenated the term and revived academic interest by addressing and comparing a variety of historical character assassination events.

«Με πιο προχωρημένες πρακτικές και αρχαίες μεθόδους, υπάρχει επίσης η δυνατότητα να ελέγχονται οι σκέψεις και οι πράξεις ανθρώπων στον φυσικό κόσμο.Ναι, είναι σχεδόν αδιανόητο, αλλά οι ΗΠΑ, οι πρώην Σοβιετικές κυβερνήσεις και διάφορες σκιώδεις οργανώσεις κάνουν αυτού του είδους την έρευνα εδώ και δεκαετίες και έχουν πετύχει πράγματα, πέρα από την πιο τρελή φαντασία».

The contemporary settler-colonialism, which is being perpetrated by the U2RIT, violates the entire international law and it is a quasi “champion” in committing genocides.

Consequently, the colonizers need to destroy each and every anti-colonialism activist.

One of the methods which they employ in order to accomplish this destruction is, by perpetrating character-assassinations against the anti-colonialism activists after they have, illegitimately and involuntarily, brain-implanted them, with brain-locking and remote-neural-monitoring technology (like they have done to myself).

The fluency to commit criminal character-assassinations against brain-implanted targeted-individuals which, this technology gives to the colonizers, exceeds even the wildest imagination. And I make this claim as currently being an eye witness and a victim of a long-term and systematic character-assassinations campaign.

There are physical-places which, the colonizers profoundly control; there are organizational-forms which, the colonizers profoundly control; and there are technological/digital/mechanical systems/devices which, the colonizers profoundly control.

My recommendation towards all targeted-individuals is for them to avoid, at all costs, even to approximate such physical-places, and organizational-forms, and technological/digital/mechanical systems/devices; otherwise, they jeopardize their personal security and they are excessively risking to become character-assassinated for one more time.
