According to my personal, non-negotiable, and strictly applied upon my life, beliefs, the human-life is sacred and invaluable; thus, I unconditionally condemn all self-destructive/suicidal tendencies and choices.

So what? If others sane adults while, they are sober and in cold-blooded, they choose to be, against their own selves, self-destructive/ suicidal, why should I do something about it?

For example, the ages-long settler-colonizing U2RIT professionally, serially, and remorselessly, they assassinate the, targeted by them Nations' natural-leaderships' members. And, by this way, they initiate our common world's dynamics of long-term equilibrium, which was described, by Fiodor Dostoyevski at "Crime and Punishment", and by the science at the Anthropic-Principle.

The military technology that the U2RIT posses combined by their, scientific level of, knowledge in murdering innocent human beings, they live no room, for ordinary citizens like myself, to intervene for rescuing the U2RIT.

Also, the same line of though seem to apply for all those which, they earn their living by exploiting false face-saving excuses in order to criminally violate, in any way, the human-rights of, arbitrarily designated by the U2RIT, innocent civilians; and even, for all groups of people which they chosen

to be immoral.

All of the above criminal, when the time is right, they shall collect their own just punishment; there is no escape at all.

Concluding, I am looking forward for the time to come when, a non-metadata digital communication channel at the 27 MHz shall unite all the moral people, in Europe, by having overcome the quasi unfreedom-of-speech that, the conventional digital telecommunications channels they have de facto imposed on them.

Christos Boumpoulis

economist

P.S.: If, helping others exclusively for the benefit of the others (and not, within trilateral relationships, for the coordinated destruction of a victimized third party) is the most fundamental trait of the human-civilization, then, can anyone tell, how much civilization, the U2RIT, now, is able and willing, to enjoy? Is, in the end of the day, the U2RIT's still keeping as hostages, innocent civilians, anything else then a self-destructive/suicidal choice against their own selves? And now that the Greek-dictatorship is down-falling, is, the U2RIT's, almost hysterical, urge to exterminate all remaining, indigenous Greek-Patriots, anything else than paramount lacking of prudence? For the U2RIT, assassinating human-rights activists is, literary, so sweet, as the honey is for the bears.

Of COURSE Leo had to get in on the honey. What self respecting Syrian brown bear would miss out?
